4800 METAL PRO PRIMER

Premium Performance for Metal Protection

Metal Pro Primer is a light industrial, low VOC, fast-drying, water-based acrylic primer designed for superior adhesion to metal surfaces, especially galvanized metal. It forms a durable, protective base coat that helps prevent oxidation and corrosion, making it ideal for both interior and exterior applications.

Recommended Uses: 4800 Metal Pro Primer is recommended for non-ferrous metal (*metals not containing iron*) and galvanized metals. For maximum durability and long-term protection, we recommend top coating with our Protec Series: *9700 Protec Satin, 9800 Protec Semi-Gloss or 9900 Protec Gloss*

Key Features

- Exceptional adhesion to non-ferrous metals, especially galvanized metal
- Protects against rust, oxidation, and corrosion
- Water-based & Low VOC
- Excellent durability in harsh weather conditions
- Easy soap & water cleanup
- Suitable for residential, commercial, & industrial use
