5740 SEMI-GLOSS	<i>Int./Ext. Finish</i>
8700 DTM SERIES	<i>Int./Ext. Finish</i>
8900 CLEAR SERIES	<i>Int./Ext. Finish</i>

POLYTEC SERIES

PREMIUM+ ACRYLIC POLYURETHANE

The **Polytec** series is a line of premium-plus architectural coatings for use over wood, drywall, cementitious substrates, primed metal and cabinetry. It is based on a multi-phase, self-crosslinking acrylic and polyurethane polymer system that incorporates proprietary resin technologies. This combination results in an exceptionally tough surface that resists household chemicals and damage from heavy use. These qualities give the coating a hard, durable finish, characteristic of a superior architectural product. In addition, this technology provides excellent adhesion to a wide range of surfaces, including plastics.

Key **benefits** of the Polytec series include:

- **Non-Yellowing**
- **Outstanding Adhesion**
- **Resistant to Chemicals & Corrosion**
- **Superb Color & Gloss Retention**
- **Water Resistance**
- **Industrial Enamel Performance**
- **Low Odor and Low V.O.C.***
- **Superior Exterior Durability**
- **Available in DTM**
- **MPI Approved**

IDEAL FOR:

Hospitals

Schools

Commercial

Residential

Door & Trim

Wrought Iron
