PROTEC SERIES

PREMIUM+ ALKYD EMULSION ENAMEL

The **Protec** series is a premium-plus line of high-performance alkyd emulsion enamels, uniquely formulated for versatility across a wide range of surfaces and conditions. With strong corrosion-resistant properties, Protec is an excellent choice as a rust-preventative coating on metals and can be applied as a direct-to-metal (**DTM**) coating on properly prepared surfaces.

Key **benefits** of the Protec series include:

- **Excellent Corrosion Resistance**
- **Strong Blocking Resistance**
- **Superior Durability**
- **Easy Water Clean-up**
- **Low Odor & Low V.O.C.***
- **LEED Compliant**
- **MPI Approved**
