

THE VISTA PAINT DIFFERENCE

*Cleaner for contractors. Cleaner for customers.
Cleaner for California, Nevada, Arizona, and everywhere our products go.*

CALIFORNIA'S ECO-FORWARD PAINT MANUFACTURER WITH A FOOTPRINT THAT REACHES FAR BEYOND

At Vista Paint, protecting the environment isn't just a California principle, it's the foundation of everything we do! While we are proudly rooted in California as an eco-forward, family-owned paint manufacturer, our impact extends well beyond the Golden State, serving customers throughout Nevada, Arizona, and international markets with the same commitment to sustainability and performance.

CUTTING-EDGE ZERO VOC AND LOW VOC TECHNOLOGY

Vista Paint leads the industry with a comprehensive line of Zero VOC and Low VOC coatings engineered for superior performance without compromising air quality.

- Zero VOC formulations available in top-selling interior and exterior products.
- Low VOC options that outperform traditional paints while meeting strict environmental guidelines.
- Delivers high hide, excellent durability, and premium application characteristics.

Cleaner air. Cleaner spaces. Cleaner results.

Ideal for

Schools

Hospitals

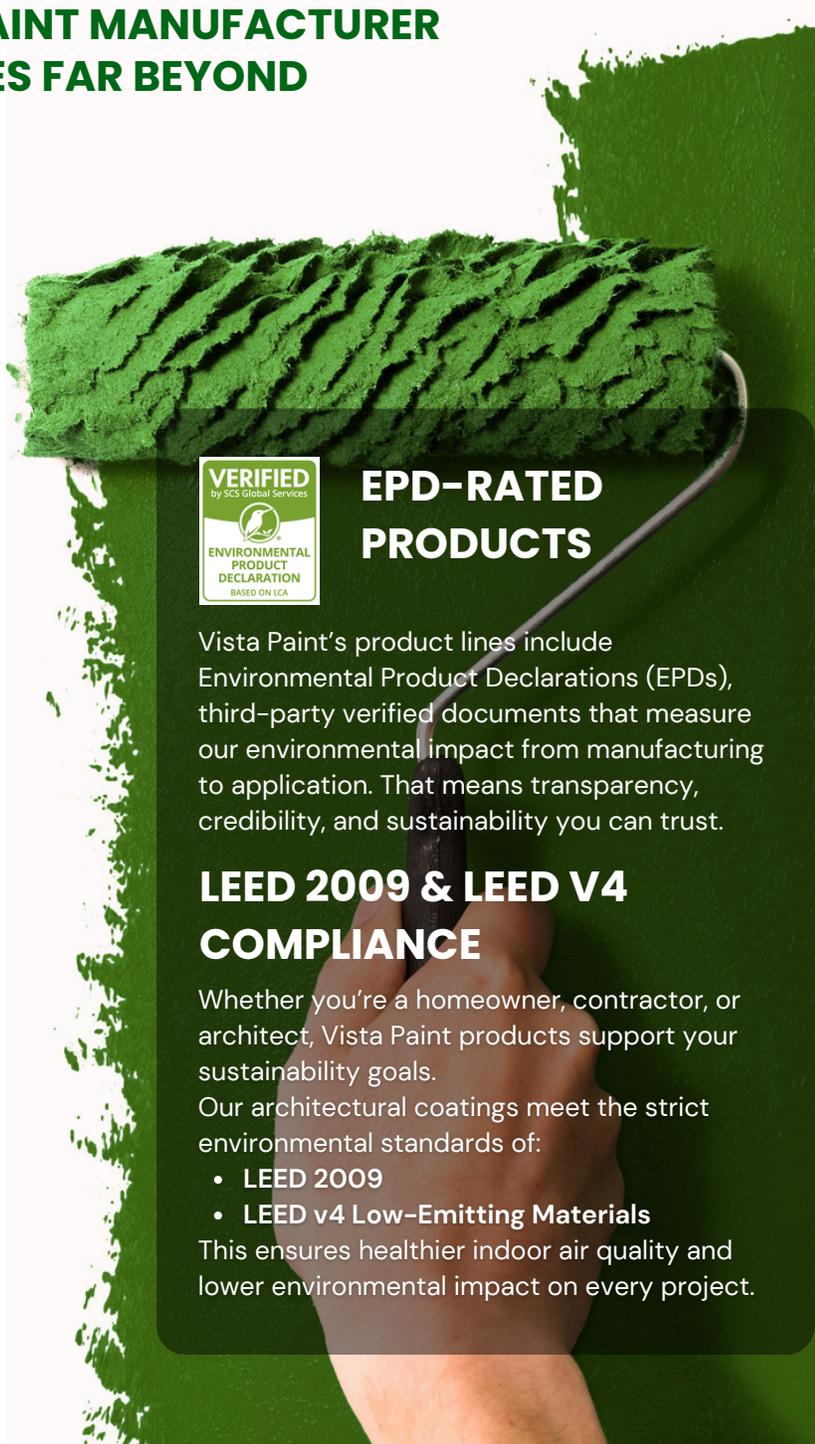

Homes

Commercial Buildings

ECO-FRIENDLY BY DESIGN

From solar-powered operations to zero-discharge water systems, from PFAS-free formulations to verified EPD sustainability, Vista Paint is setting the eco-standard for the paint industry.

EPD-RATED PRODUCTS

Vista Paint's product lines include Environmental Product Declarations (EPDs), third-party verified documents that measure our environmental impact from manufacturing to application. That means transparency, credibility, and sustainability you can trust.

LEED 2009 & LEED V4 COMPLIANCE

Whether you're a homeowner, contractor, or architect, Vista Paint products support your sustainability goals.

Our architectural coatings meet the strict environmental standards of:

- LEED 2009
- LEED v4 Low-Emitting Materials

This ensures healthier indoor air quality and lower environmental impact on every project.

100% SOLAR-POWERED MANUFACTURING

Our primary manufacturing plant operates entirely on 100% solar energy, dramatically reducing our carbon footprint and making Vista Paint one of the cleanest run facilities in the country.

ZERO-DISCHARGE WATER RECYCLING

We believe clean water belongs in the environment, not in waste streams. Vista Paint proudly maintains a zero-discharge operation, recycling and reusing all wash water to ensure no environmental runoff and minimal waste.

NON-EG CERTIFIED FORMULATIONS (NO ETHYLENE GLYCOL)

Many Vista Paint products are Non-EG Certified, formulated without Ethylene Glycol (EG), a chemical listed as both a toxic air contaminant and a hazardous pollutant.

- EG is a solvent commonly used in some water-based paints.
- Vista Paint has eliminated EG by using non-toxic, environmentally safer alternatives.
- Any Vista Paint product carrying our Non-EG logo is verified to contain zero Ethylene Glycol.

Safer for applicators. Safer for occupants. Safer for the environment.

PFAS-FREE FORMULA A TRUE STANDOUT

Vista Paint is proud to be among the few paint manufacturers in the country offering 100% PFAS-free paint products, without compromising performance.

- No "forever chemicals."
- No hidden additives.

Just safer, cleaner, high-performance coatings.
